Sub: Community Awareness Programme: "HPV Awareness and Screening: Enhancing Community Health Outcomes"

Dear HR Manager

As discussed with you earlier, we are planning a community outreach programme on Human Papillomavirus (HPV) to determine the prevalence while simultaneously raising awareness about the virus in the rural community of Haryana. Our commitment to advancing public health through education and research drives this initiative. By increasing awareness about HPV, its associated risks, and prevention methods, we aim to promote healthier lifestyle practices within the community.

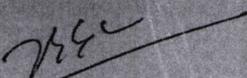

For the purpose, we kindly request your approval of the proposed budget for this project.

Phase I- Awareness and Screening

	Expected expenditure	
Screening for HPV in population (n=1000)	Testing cost (diagnostic)	700 X 1000= 7,00,000/-
	Total	7,00,000/-

Phase II- Prevention

Vaccination for HPV	Cost of vaccination x100 person (cost per person approx. 5000/-)	5,00,000/-
	Total	5,00,000/-

Project Proposal

Title: HPV Awareness and Screening: Enhancing Community Health Outcomes"

Rationale: Cervical cancer is one of the preventable cancer which has causal relationship with Human papilloma virus (HPV) infection. The rise in cervical cancer in sexually active females have necessitates screening of females in reproductive age group for cervical cancer and further underscores the need to identify prevalent HPV strains in the community to formulate targeted HPV vaccination in communities.

Setting: Chandu-Budhera, Haryana

Place: SGT Hospital

Study Design: Cross sectional study

Aim: To raise awareness of HPV infection and determine its prevalence among women of reproductive age group in Chandu-Budhera area of Haryana

Primary Objective:

- To raise awareness among HPV infection in rural population of Haryana
- Prevalence of HPV in cervical specimen of women in reproductive age group in rural area of Haryana.

Secondary Objectives:

1. To raise awareness against HPV among the rural population
2. Educate the susceptible population on effects of lifestyle (behavioural) modification in prevention of HPV
3. To screen for HPV infection in women of reproductive age group.
4. To determine the high-risk strains of HPV circulating in the community
5. To evaluate urine as alternative specimen for detection of HPV.
6. To vaccinate susceptible population against HPV.

Outcomes for community benefit:

1. To raise awareness of HPV and its prevention among rural population
2. Free screening of women for early detection of cervical cancer and follow up if needed.
3. Identification of high-risk behavior and advice on behavioral modification
4. Vaccination against HPV
